Declass Review by NGA.

MEMORANDUM FOR: Assistant for Technical Development, NPIC

25X1
ATTENTION :

SUBJECT : Comments on On-Line Measuring System

1. The Photographic Analysis Group has reviewed the Development Objectives and would like to forward the following comments:

- a. It is necessary to have the entire system mounted and checked out including; heads, grids, light table, console-to-computer-to-teletype to insure compatibility, accuracy and repeatability of measurements within limitations of the overall system components.
- b. Unit mounting of the "DIG" should be adaptable to present equipment (940 MCE); later, modifications can be determined for its use with other light tables designs.
- c. Consideration should be given to type of mounting for "DIG" grids and reading heads in order to insure correct alinement for interchangeability.

2. With the above considerations PAG agrees with the On-Line Measuring System Design Objectives.

Colonel, USA

Assistant for Photographic Analysis, NPIC
